SEARCHING FOR PRODUCTS
Our assortment features thousands of products. There are several different ways to search for products you are looking for.

KEYWORD SEARCH
• Here you can type in name of item, manufacturer, item number or just a general description and hit “Enter” on your keyboard.
• Your results will appear in what we call the “List View.”
• From the list view, you can quickly adjust the quantity and add the item to your cart or go to the product page of that item for more information. More on that later.

PRODUCT CATEGORIES
• Another way to shop is to browse the product catalog by going through the product categories at the top of the page.
• For instance, if you are looking for a Cleaning Chemical product, hover over that category and a second level will appear.
• Select the category you wish to search and you will be brought to a landing page with more search results. You have the ability to drill down even further either by category or by attribute and/ or manufacturer on the left hand side of the page within these search results.
• Once you find what you are looking for, you can adjust the quantity and quickly add the item to your cart.

TIP FROM THE EXPERTS
If an item that you are interested in is indicated as a Special Order item, click on the Email your Customer Service Rep link and you can easily send an email to your CS Rep to inquire about the item – all the required information will be pre-populated into the email; all you have to do is click SUBMIT.
PRODUCT DETAIL PAGES

- If you want to learn more about a specific product, download the SDS if applicable, see if there are related items associated with this item, etc., click on the image from the search result and you will be taken to the product detail page.

- Here you will see all of the information regarding the product. Click to expand the tabs towards the bottom of the page for more information.

- From the Product Detail Page, you can add the item to your cart, add the item to an existing or new shopping list (see page 9) for more info or share the info on this product with a co-worker.

TIP FROM THE EXPERTS

If there is an OPTIONS button, it means there are more items in that family of products. Click on that to see all of the variations that item is available in (size, color, etc).
